RALE WAY

Matt McInerney

Raleway

is an elegant yet intriguing typeface, blending simplicity with unexpected details. Originally designed in 2010 by Matt McInerney, Raleway belongs to the Neo-grotesque style, a category of sans-serif fonts characterized by regular form and little line-width variation—an evolution of the original Grotesque sans-serifs.

At first glance, Raleway appears to be nothing more than a simple sans-serif typeface—elegant and sleek, but ultimately boring. Upon closer inspection, its curiosities make themselves known. Subtle quirks like the overbite of the lowercase ‘e’, the tail of the lowercase ‘l’, and perhaps most notably, the crossed lines of the ‘W’, give the font a distinct personality.

Raleway’s journey has had its challenges. When it was first released, the font was limited to a single line weight, causing some disappointment among designers. Over time, however, ImpallariType expanded the typeface into a full 9 weights family, including italics in 2016.

The family has also grown to include Raleway Dots, ideal for posters and big headlines, and Raleway color, a vibrant, playful alternative.

For designers wanting to veer away from the neo-grotesque, Raleway also has an alternate, geometrically pleasing set of glyphs. Despite its humble beginnings, Raleway is evolving into a versatile and flexible typeface, respected by designers across various mediums.
