Our Story

Sandwicho is based in Hyderabad, India. It's a restaurant that serves international cuisines; fusion foods like our signature mango panna cotta take center stage.

Along with our great food, we pride ourselves on having a great sense of humor; despite our restaurant being named Sandwicho, we are not just a sandwich place. We have a variety of different foods for customers to enjoy.

With our funky charm and family-friendly atmosphere, Sandwicho is truly a unique dining experience!

Brand Attitude and Values

Sandwicho strives to be positive, cheeky, and kitschy in a way that invites color into the dining experience. We want all of our customers to have fun, expand their palate and connect with the people around them.

Kitschy
Cheeky
Optimistic
Nostalgic
Experimental

Logo Process

The redesigned logo for the company went through a lot of changes. The designs drew on the optimistic futurism of the eighties, perfect for the nostalgia and positivity that our brands wants to bring.

Logo Versions

The final logo design shows an optimistic and experiemental vibe with its retrofurism-inspired font, while being grounded in the material world with the sandwich icon- this is a place to eat food, after all!
